

Bernalillo County Metropolitan Detention Center Monthly Report – June 2023

Report Date: July 10, 2023

Prepared for Bernalillo County by the Institute for Social Research, Center for Applied Research and Analysis
by: E. M. Ferguson & D. A. Goldberg

Criminal Justice Reforms and the Jail Population

Table 1. MDC Quick Population Figures by Month

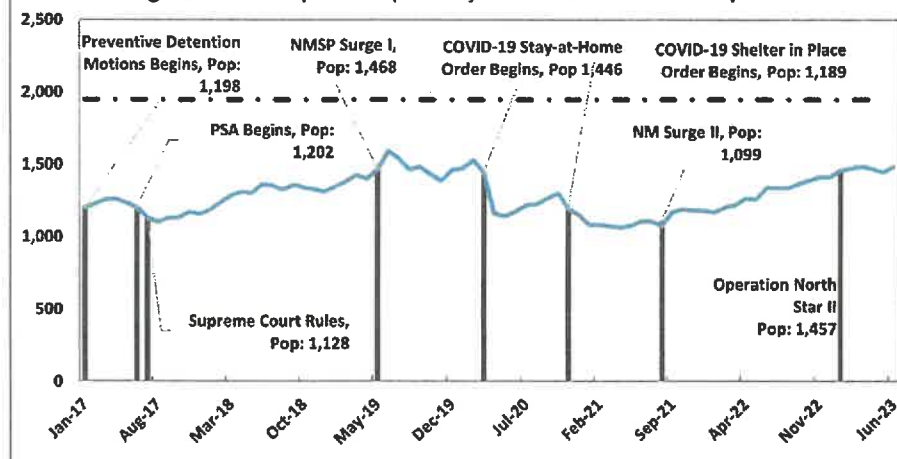

Quick Population Figures ¹	Jun 22	Jan 23	Feb 23	Mar 23	Apr 23	May 23	Jun 23
On-Site Average Daily Population	↗ 1,385	↗ 1,498	↗ 1,515	↗ 1,524	↘ 1,506	↘ 1,483	↗ 1,520
Average Community Custody Program	↘ 58	↘ 35	↗ 39	↗ 41	↗ 49	↘ 46	↗ 48
Average Total Jail Population (w/CCP)	↗ 1,443	↗ 1,533	↗ 1,554	↗ 1,565	↘ 1,555	↘ 1,529	↗ 1,568
Monthly Bookings	↗ 1,343	↗ 1,400	↘ 1,319	↗ 1,476	↘ 1,404	↗ 1,512	↘ 1,476
Bookings Ages 18-24	↗ 164	↗ 209	= 209	↘ 207	↗ 222	↘ 206	↘ 179
Monthly Releases	↗ 1,290	↗ 1,342	↘ 1,276	↗ 1,507	↘ 1,363	↗ 1,534	↘ 1,484
Average Length of Stay (in Days)	↗ 30.0	↘ 28.5	↗ 32.0	↗ 38.6	↘ 38.0	↘ 36.7	↗ 37.1
Total Consecutive Days 1,950 or Less	3,153 (over 8 ½ years)						

*Arrows show increase or decrease in counts from prior month, with the exception of 2021, which indicates if the equivalent month of the following year is an increase or decrease.

Report Highlights

- The MDC population (on-site) in June 2023 was 1,520, an increase of 2.5% from May 2023.
- The MDC population has returned to pre-COVID levels.
- Bookings decreased by 2.4% from May 2023 to June 2023 and releases decreased 3.3% over the same period.
- The LOS in June 2023 increased 1.1% from May 2023 (36.7 days to 37.1 day).
- Short-term returns to custody (within one month) post-COVID have remained lower than pre-COVID.
- In June 2023, 39.4% of motions were denied or dismissed by the courts and 53.2% were granted.

Figure 1. MDC Population (no CCP) and Initiative Initiation by Month

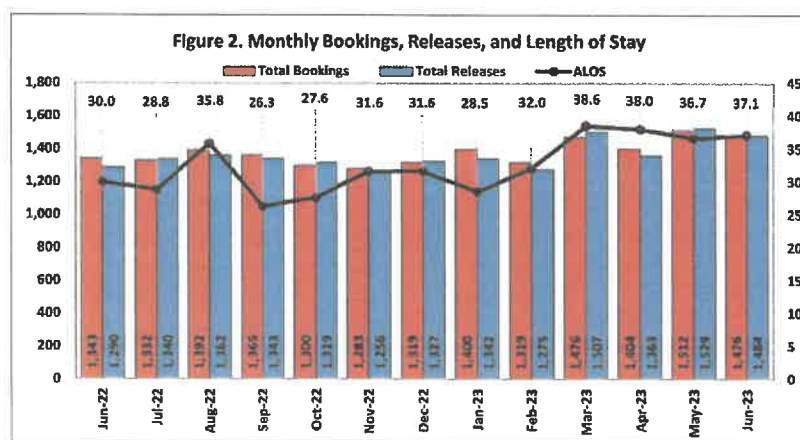

The MDC jail population decreased to a historic low starting in March 2020 and then increasing in October 2021. In June 2023, the average monthly population was 1,520, 9.7% higher than June 2022.

As of September 2022, the MDC population increased back to pre-COVID numbers. Since September 2022, the population has increased 8.3%.

¹ Jail headcounts have been modified accordingly due to MDC's migration to a new jail management system starting in December 2020.

Bookings, Releases, and Length of Stay

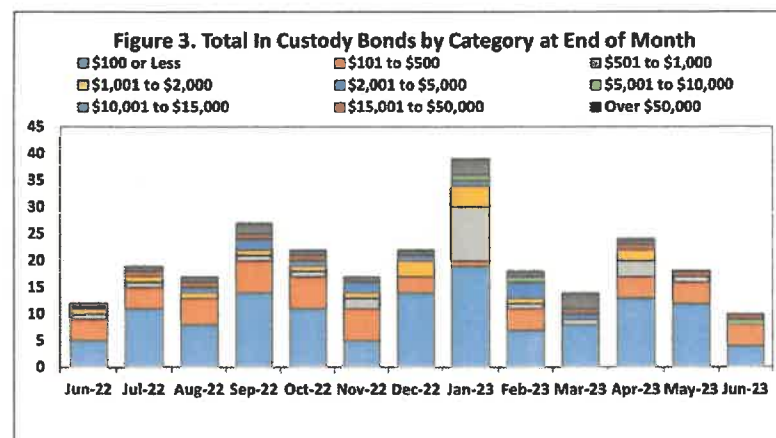

- Jail population is affected by two factors: how many people are booked and how long they are in custody.
- From May 2023 to June 2023 the number of bookings decreased (2.4%) from 1,512 to 1,476 and releases decreased (3.3%) from 1,534 to 1,484 (see Figure 2).
- There were 133 more bookings in June 2023 than in June 2022 (9.9%), and there were 194 more releases in June 2023 than in June 2022 (15.0%).
- The LOS in June 2023 was 37.1 days, 0.4 (1.1%) higher than May 2023.
- The LOS in June 2023 was higher than the LOS in June 2022 by 7.1 days (23.7%).

In Custody Bonds

- At the end of the day on June 30th, 2023, there were 1,496 inmates in custody.
- Of these, 10 inmates (0.7%) could have been released if all bonds were paid (see Figure 3).

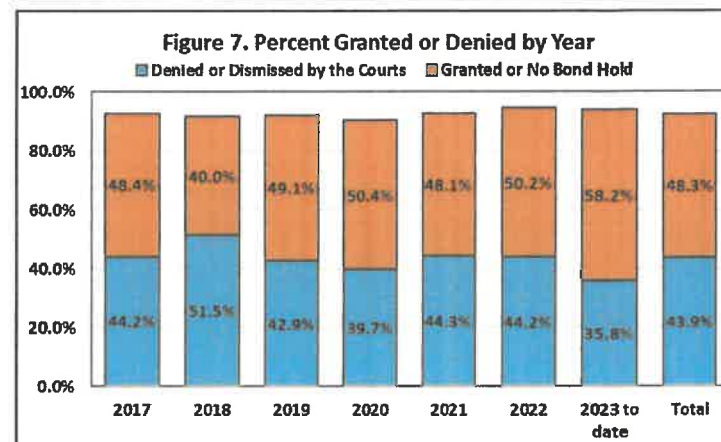

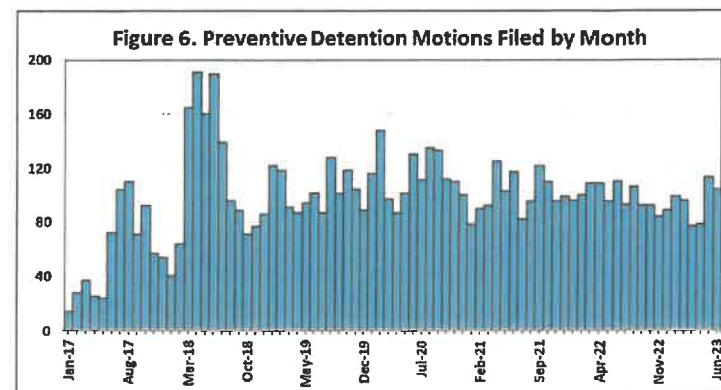

Of the 10 inmates with a bond, 4 had a bond totaling \$100 or less (40.0%), 4 had a bond between \$101 and \$500 (40.0%), 1 had a bond between \$5,001 and \$10,000 (10.0%), and 1 bond between \$15,000 and \$50,000 (10.0%). There were an average of 21 persons in custody on a bond at the end of the month during the past 12 months.

Preventive Detention Motions

From January 2017 to June 2023, there were approximately 7,626 motions for preventive detention (PTD) filed across 7,154 bookings² for 6,078 individuals. This includes motions filed in both Bernalillo County Metropolitan Court and Second Judicial District Court. The preventive detention motions were filed for a variety of charge types, included shoplifting, burglary, auto theft, assault, and murder. In the last 12 months, the number of PTD motions filed per month ranged from 77 to 113, with an average of 94 per month (see Figure 6). There were 104 motions filed in June 2023, 6 (5.5%) fewer than in June 2022.

In June 2023, 39.4% of motions were denied or dismissed and 53.2% were granted³. By year, since 2019, a greater portion of motions have been granted than denied (see Figure 7). Between January and June 2023, 58.2% of motions were granted and 35.8% were denied or dismissed. Since 2017, 48.3% of motions have been granted and 43.9% have been denied. The remainder were withdrawn (4.4%) or the underlying case was nolle prosequied, dismissed, or sentenced (3.4%).

The UNM - Institute for Social Research (ISR) is a leading provider of program evaluations and policy research in New Mexico. ISR staff members and faculty affiliates also have expertise in the fields of criminal justice, education, economics, substance abuse treatment programs, poverty and homelessness, domestic violence, employee workloads and staffing levels. For more information on the ISR, please visit <http://isr.unm.edu/> or call (505) 277-4257.

² Approximately 100 of these motions occurred when an inmate was not booked into the MDC, but this is generally uncommon.

³ At the end of June 2023, there were approximately 33 cases that had a PTD motion pending. These cases were removed from the motion outcomes analysis.

Recidivism

According to the Bureau of Justice Statistics, a recidivism measure requires three items: a starting event, such as a release from a facility; a measure of failure, such as a booking; and a follow-up time period from the starting event. Compared to prisons, jails have a much higher rate of turnover. A preliminary recidivism rate was calculated for the MDC using the following:

- Unique monthly releases beginning in January 2018 through May 2023. The releases end the month prior to reporting to allow the same follow-up time-period for each month.
- Bookings in subsequent months within approximate one-month intervals (365/12).
- The measure of failure is any new booking into the MDC.

During the first three months following release from the MDC, 24.8% of inmates return to custody (see Figure 4), increasing to 35.9% within six months. The cumulative recidivism rate increased over time 64.5% inmates returning to custody for any booking within five years. Recidivism occurs with decreasing frequency over time, so inmates typically return to custody within a shorter time frame rather than years after release.

Short-term returns to custody decreased after March 2020 from 12.7% from January 2018 to February 2020 and 9.2% from March 2020 to May 2023 (see Figure 5). From March 2020 to May 2023: 8.8% of inmates returned to custody in the first month, 7.6% returned to custody in the second month, and 5.6% returned to custody in the third month.
